### DETAILED ACTION

1. The amendment filed 3/11/03 has been entered. Claims 1-12, 14, 18-29 and 32 are pending in the application.
2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-12 and 18-29 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claims 1, 23, 24 and 25 recite the limitation “a blend of polyethylene and a polyethylene plastomer” however the term “polyethylene plastomer” reads on “polyethylene” and vice versa given that the specification does not define these terms to indicate any difference between them. A claim in which one ingredient is defined so broadly that it reads upon a second does not meet the requirements of 35 U.S.C. 112, second paragraph. See *Ex parte Ferm and Boynton*, 162 USPQ (BdPatApp & Int 1969.)

### *Allowable Subject Matter*

5. Claim 14 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
6. Claim 32 is allowable. The closest prior art DiPoto does not teach a multilayer film structure comprising a first layer of polyethylene having a density of about 0.960 g/cc and comprising about 80% of the film layer, and a colorant; a second layer comprising polyethylene

Art Unit: 1773

having a density of about 0.960 g/cc comprising about 75% of the second layer, and a colorant; a third layer comprising a blend of a polyethylene with a density of about 0.921 g/cc comprising about 65% of the layer and a polyethylene having a density of about 0.911 g/cc comprising about 30% of the layer; wherein the layers have the instantly claimed layer thickness and the first layer is laminated to oriented PET film.

***Response to Arguments***

7. Applicant's arguments with respect to claims 1-12 and 18-29 have been considered but are moot in view of the new ground(s) of rejection.
